SOFTWARE DEVELOPMENT PROPOSAL Cake Order Management System | Home Town Cakes

P. Muthu Karuppaiya | sivamkaruppaiya15@gmail.com | Ph: 6383142368 | github.com/Muthukaruppaiya Page 1 of 6

## 01 Project Overview

Development of a fully responsive Cake Order Management System for Home Town Cakes — enabling customers to browse, order, and receive confirmations online, while admins manage products, orders, and customers via a secure dashboard.

| Home Town Cakes | P. Muthu Karuppaiya | 20–25 Working Days | Rs. 20,000 |
|-----------------|---------------------|--------------------|------------|

## 02 Features Included

| ✓ Home Page & Cake Listings   | ✓ Secure Admin Login         |
|-------------------------------|------------------------------|
| ✓ Add to Cart Functionality   | ✓ Product Management (CRUD)  |
| ✓ Order Placement Flow        | ✓ Order Management Dashboard |
| ✓ WhatsApp Order Confirmation | ✓ Update Order Status        |
| ✓ Mobile-Responsive UI        | ✓ Customer Management        |

## 03 Technology Stack

| Frontend   | React.js + Vite      | Component-based UI, fast build tooling     |
|------------|----------------------|--------------------------------------------|
| Backend    | Node.js + Express.js | REST API server, business logic & auth     |
| Database   | PostgreSQL           | Relational DB — orders, products, users    |
| Deployment | Vercel + Render      | Cloud hosting for frontend, API & database |

## 04 Hosting Details

| Frontend             | Vercel | Free Tier           | Free                          |
|----------------------|--------|---------------------|-------------------------------|
| Backend              | Render | Starter Web Service | Rs. 700 – 900                 |
| Database             | Render | PostgreSQL Managed  | Rs. 700 – 900                 |
| <b>Total Hosting</b> | —      | —                   | <b>Rs. 1,400 – 1,800 / mo</b> |

\* Hosting costs are billed separately and excluded from development cost.

## 05 Project Quotation

| 1 | UI/UX Design         | Wireframes, design system & mockups | Rs. 2,000         |
|---|----------------------|-------------------------------------|-------------------|
| 2 | Frontend Development | React.js pages, routing, API hooks  | Rs. 7,000         |
| 3 | Backend Development  | Node.js REST APIs, auth, DB schema  | Rs. 5,000         |
| 4 | Admin Panel          | Dashboard, CRUD, order management   | Rs. 5,000         |
| 5 | Deployment & Testing | QA testing, cloud deployment, SSL   | Rs. 3,000         |
|   |                      |                                     | <b>Rs. 20,000</b> |

## 06 Payment Information

Customer account creation on the platform is **completely free** — there are no signup fees, subscription charges, or hidden costs associated with registering an account.

However, a **transaction fee of minimum 2%** will be charged on each order payment processed through the platform. This fee is applied at the time of payment and covers payment gateway processing costs.

| Customer Account Creation | Sign up / Register on platform | Free                       |
|---------------------------|--------------------------------|----------------------------|
| Order Transaction Fee     | Per order payment processed    | Minimum 2% per transaction |

\* The transaction fee may vary depending on the payment gateway provider selected during deployment. The minimum applicable rate is 2% per transaction.

## 07 Additional Charges

---

| Domain Name (.com) | Monthly | Rs. 70 – 100    | Approx. monthly equivalent |
|--------------------|---------|-----------------|----------------------------|
| Domain Name (.com) | Yearly  | Rs. 800 – 1,200 | Purchased via registrar    |

## 08 Project Timeline

| UI/UX Design           | 2–3 days          | Wireframes, design mockups                     |
|------------------------|-------------------|------------------------------------------------|
| Frontend Development   | 6–8 days          | React pages, routing, cart, order flow         |
| Backend Development    | 5–6 days          | APIs, authentication, DB schema                |
| Admin Panel            | 3–4 days          | Dashboard, product & order management          |
| Testing & Deployment   | 2–3 days          | QA, bug fixes, Vercel + Render deploy          |
| <b>Total Estimated</b> | <b>20–25 days</b> | <b>Fully deployed &amp; tested application</b> |

## 09 Terms & Conditions

|                             |                                                                    |
|-----------------------------|--------------------------------------------------------------------|
| <b>Payment</b>              | 50% advance required before project starts; balance on delivery.   |
| <b>Scope Changes</b>        | Additional features beyond agreed scope will be quoted separately. |
| <b>Hosting &amp; Domain</b> | All hosting and domain costs are excluded from development fee.    |
